

# AMERICAN JOBS PLAN

## *The Need for Action in Alaska*

For decades, infrastructure in Alaska has suffered from a systemic lack of investment. The need for action is clear:

Alaska's infrastructure received a **C-** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Alaska there are 141 bridges and over 570 miles of highway in poor condition. Since 2011, commute times have increased by 7.5% in Alaska and on average, each driver pays \$402 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Alaskans who take public transportation spend an extra 120% of their time commuting. 14% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Alaska has experienced 2 extreme weather events, costing the state up to \$1 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Alaska's drinking water infrastructure will require \$987 million in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 37,000 renters in Alaska are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 24.5% of Alaskans live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 68.8% of Alaskans live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 12% of Alaska households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Alaska, there is an estimated \$121 million gap in what schools need to do maintenance and make improvements and 61% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Alaska and the country.

- **MANUFACTURING:** Manufacturers account for about 3% of total output in Alaska, employing 13,000 workers, or 4.0% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers.
- **HOME ENERGY:** In Alaska, an average low-income family spends 6-8% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 5,628 Alaskans working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Alaska is home to over 69,000 veterans, 13.8% of whom are women and 29.7% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in Alabama*

For decades, infrastructure in Alabama has suffered from a systemic lack of investment. The need for action is clear:

Alabama's infrastructure received a C- grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Alabama there are 620 bridges and over 2,950 miles of highway in poor condition. Since 2011, commute times have increased by 8.9% in Alabama and on average, each driver pays \$434 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Alabamians who take public transportation spend an extra 66.2% of their time commuting and non-White households are 4.5 times more likely to commute via public transportation. 25% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Alabama has experienced 38 extreme weather events, costing the state up to \$20 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Alabama's drinking water infrastructure will require \$11.3 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 260,000 renters in Alabama are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 16.8% of Alabamians live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 55.4% of Alabamians live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 18.4% of Alabama households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Alabama, there is an estimated \$299 million gap in what schools need to do maintenance and make improvements and 60% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Alabama and the country.

- **MANUFACTURING:** Manufacturers account for more than 17% of total output in Alabama, employing 271,000 workers, or 13% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers.
- **HOME ENERGY:** In Alabama, an average low-income family spends 10-12% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 43,828 Alabamians working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Alabama is home to over 370,000 veterans, 10.6% of whom are women and 43.5% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in Arkansas*

For decades, infrastructure in Arkansas has suffered from a systemic lack of investment. The need for action is clear. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Arkansas there are 663 bridges and over 6,700 miles of highway in poor condition. Since 2011, commute times have increased by 3% in Arkansas and on average, each driver pays \$671 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Arkansans who take public transportation spend an extra 31.7% of their time commuting and non-White households are 3.8 times more likely to commute via public transportation. 27% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Arkansas has experienced 32 extreme weather events, costing the state up to \$10 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Arkansas' drinking water infrastructure will require \$7.4 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 168,000 renters in Arkansas are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 27% of Arkansans live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 54% of Arkansans live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 20% of Arkansas households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Arkansas, there is an estimated \$350 million gap in what schools need to do maintenance and make improvements and 35% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Arkansas and the country.
- **MANUFACTURING:** Manufacturers account for more than 15% of total output in Arkansas, employing 164,000 workers, or 12.8% of the state's workforce. The American Job's Plan will invest \$300 billion to

retool and revitalize American manufacturers.

- **HOME ENERGY:** In Arkansas, an average low-income family spends 10-12% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 20,377 Arkansans working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Arkansas is home to over 222,000 veterans, 8% of whom are women and 46% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

## *The Need for Action in California*

For decades, infrastructure in California has suffered from a systemic lack of investment. The need for action is clear:

California's infrastructure received a **C-** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In California, there are 1,536 bridges and over 14,220 miles of highway in poor condition. Since 2011, commute times have increased by 14.6% in California and on average, each driver pays \$799 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nation's transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Californians who take public transportation spend an extra 66.6% of their time work commuting and non-White households are 1.6 times more likely to commute via public transportation. 16% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, California experienced 16 extreme weather events, costing the state up to \$50-1000 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, California's drinking water infrastructure will require \$51 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 3,127,000 renters in California are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 5.5% of Californians live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 59.2% of Californians live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 10% of California households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In California, there is an estimated \$3.22 billion gap in what schools need to do maintenance and make improvements and 60% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across California and the country.

- **MANUFACTURING:** Manufacturers account for more than 10% of total output in California, employing 1,338,000 workers, or 7.7% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers.
- **HOME ENERGY:** In California, an average low-income family spends 4-6% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 536,919 Californians working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** California is home to over 1,681,730 veterans, 8.5% of whom are women and 50.5% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in Colorado*

For decades, infrastructure in Colorado has suffered from a systemic lack of investment. The need for action is clear:

Colorado's infrastructure received a **C-** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Colorado there are 481 bridges and over 3,600 miles of highway in poor condition. Since 2011, commute times have increased by 9.3% in Colorado and on average, each driver pays \$651 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Coloradans who take public transportation spend an extra 74.6% of their time commuting and non-White households are 1.8 times more likely to commute via public transportation. 12% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Colorado has experienced 30 extreme weather events, costing the state up to 50 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Colorado's drinking water infrastructure will require \$10.2 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 379,000 renters in Colorado are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 12.1% of Coloradans live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 38.1% of Coloradans live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 9% of Colorado households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Colorado, there is an estimated \$640 million gap in what schools need to do maintenance and make improvements and 51% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Colorado and the country.

- **MANUFACTURING:** Manufacturers account for more than 6% of total output in Colorado, employing 149,000 workers, or 5.4% of the state's workforce. The American Jobs Plan will invest \$300 billion to retool and revitalize American manufacturers.
- **HOME ENERGY:** In Colorado, an average low-income family spends 4-6% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 62,420 Coloradans working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Colorado is home to over 403,000 veterans, 11.2% of whom are women and 42% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in Connecticut*

For decades, infrastructure in Connecticut has suffered from a systemic lack of investment. The need for action is clear:

Connecticut's infrastructure received a **C-** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Connecticut there are 248 bridges and over 2,100 miles of highway in poor condition. Since 2011, commute times have increased by 10.9% in Connecticut and on average, each driver pays \$711 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Connecticut residents who take public transportation spend an extra 130.4% of their time commuting and non-White households are 2.1 times more likely to commute via public transportation. 19% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Connecticut has experienced 15 extreme weather events, costing the state up to \$5 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Connecticut's drinking water infrastructure will require \$4 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 237,000 renters in Connecticut are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** Almost 18% of residents in Connecticut live in areas where, by one definition, there is only one internet provider with broadband infrastructure that provides minimally acceptable speeds and nearly 12% do not have an internet subscription. Even where infrastructure is available, broadband may be too expensive to be within reach. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Connecticut, there is an estimated \$689 million gap in what schools need to do maintenance and make improvements and 44% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Connecticut and the country.

- **MANUFACTURING:** Manufacturers account for more than 11% of total output in Connecticut, employing 161,000 workers, or 9.5% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers, including providing incentives for manufacturers to invest in innovative energy projects.
- **HOME ENERGY:** In Connecticut, an average low-income family spends 8-10% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 42,455 people in Connecticut working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Connecticut is home to over 184,000 veterans, 7.4% of whom are women and 56.8% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in the District of Columbia*

For decades, infrastructure in the District of Columbia has suffered from a systemic lack of investment. The need for action is clear:

The District of Columbia's infrastructure received a C- grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In the District of Columbia there are 8 bridges and over 402 miles of highway in poor condition. Since 2011, commute times have increased by 2% in the District of Columbia and on average, each driver pays \$1,100 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nation's transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** D.C residents who take public transportation spend an extra 25.2% of their time commuting and non-White households are 0.7 times more likely to commute via public transportation. 5% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** The District of Columbia has experienced extreme weather events, costing the city millions in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, The District of Columbia's drinking water infrastructure will require \$1.75 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 79,000 renters in the District of Columbia are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** Even where infrastructure is available, for many District residents, reliable broadband may be too expensive to be within reach. Nearly 13% of District households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In the District of Columbia, 27% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across the District and the country.
- **MANUFACTURING:** Manufacturers employ 1,000 residents in the District and account for \$300 million in total output. The American Job's Plan will invest \$300 billion to retool and revitalize American

manufacturers.

- **HOME ENERGY:** In the District of Columbia, many low-income families are forced to make tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 15,383 District residents working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** The District of Columbia is home to close to 28,000 veterans, 14% of whom are women and 41% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in Delaware*

For decades, infrastructure in Delaware has suffered from a systemic lack of investment. The need for action is clear:

Delaware's infrastructure received a **D** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Delaware there are 19 bridges and over 250 miles of highway in poor condition. Since 2011, commute times have increased by 5% in Delaware and on average, each driver pays \$456 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Delaware residents who take public transportation spend an extra 87% of their time commuting and non-White households are 3.7 times more likely to commute via public transportation. 10% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Delaware has experienced 10 extreme weather events, costing the state up to \$2 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Delaware's drinking water infrastructure will require \$806 million in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 50,000 renters in Delaware are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** Almost 60% of residents in Connecticut live in areas where, by one definition, there is only one internet provider with broadband infrastructure that provides minimally acceptable speeds and 11% do not have an internet subscription. Even where infrastructure is available, broadband may be too expensive to be within reach. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Delaware, there is an estimated \$102 million gap in what schools need to do maintenance and make improvements and 25% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Delaware and the country.

- **MANUFACTURING:** Manufacturers account for more than 6% of total output in Delaware, employing 28,000 workers, or 5.9% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers, including providing incentives for manufacturers to invest in innovative energy projects.
- **HOME ENERGY:** In Delaware, an average low-income family spends 8-10% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 13,943 Delaware residents working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Delaware is home to over 71,000 veterans, 9.7% of whom are women and 51% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in Florida*

For decades, infrastructure in Florida has suffered from a systemic lack of investment. The need for action is clear:

Florida's infrastructure received a **C** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Florida there are 408 bridges and over 3,564 miles of highway in poor condition. Since 2011, commute times have increased by 11.6% in Florida and on average, each driver pays \$425 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Floridians who take public transportation spend an extra 77.9% of their time commuting and non-White households are 3.5 times more likely to commute via public transportation. 16% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Florida has experienced 22 extreme weather events, costing the state up to \$100 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Florida's drinking water infrastructure will require \$21.9 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 1,445,000 renters in Florida are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 6% of Floridians live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 51.1% of Floridians live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 13% of Florida households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Florida, 38% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Florida and the country.

- **MANUFACTURING:** Manufacturers account for more than 5% of total output in Florida, employing 382,000 workers, or 4.2% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers.
- **HOME ENERGY:** In Florida, an average low-income family spends 8-10% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 166,032 Floridians working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Florida is home to over 1.5 million veterans, 9.5% of whom are women and 53% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in Georgia*

For decades, infrastructure in Georgia has suffered from a systemic lack of investment. The need for action is clear:

Georgia's infrastructure received a **C+** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Georgia there are 374 bridges and over 2,260 miles of highway in poor condition. Since 2011, commute times have increased by 10.8% in Georgia and on average, each driver pays \$375 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Georgians who take public transportation spend an extra 74.1% of their time commuting and non-White households are 3.9 times more likely to commute via public transportation. 7% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Georgia has experienced 46 extreme weather events, costing the state up to \$20 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Georgia's drinking water infrastructure will require \$12.5 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 654,000 renters in Georgia are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 10% of Georgians live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 38.8% of Georgians live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 15% of Georgia households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Georgia, 44% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Georgia and the country.

- **MANUFACTURING:** Manufacturers account for more than 10% of total output in Georgia, employing 411,000 workers, or 8.9% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers.
- **HOME ENERGY:** In Georgia, an average low-income family spends 10-12% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 83,806 Georgians working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Georgia is home to over 697,127 veterans, 12.7% of whom are women and 38% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

## *The Need for Action in Hawaii*

For decades, infrastructure in Hawaii has suffered from a systemic lack of investment. The need for action is clear:

Hawaii's infrastructure received a **D+** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Hawaii there are 84 bridges and over 664 miles of highway in poor condition. Since 2011, commute times have increased by 9.7% in Hawaii and on average, each driver pays \$818 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Hawaiians who take public transportation spend an extra 77.2% of their time commuting and non-White households are 2.2 times more likely to commute via public transportation. 20% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, the United States has experienced 145 extreme weather events, costing the nation an estimated \$921 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Hawaii's drinking water infrastructure will require \$1.2 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 98,000 renters in Hawaii are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 44% of Hawaiians live in areas where, by one definition, there is only one broadband internet provider that provides minimally acceptable speeds. Even where infrastructure is available, broadband may be too expensive to be within reach. 12% of Hawaii households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Hawaii, there is an estimated \$88 million gap in what schools need to do maintenance and make improvements and 68% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Hawaii and the country.

- **MANUFACTURING:** Manufacturers account for more than \$187 billion of total output in Hawaii, employing 14,000 workers, or 2% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers.
- **HOME ENERGY:** In Hawaii, an average low-income family spends 6-8% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 13,927 Hawaiians working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Hawaii is home to over 112,304 veterans, 10.6% of whom are women and 44.6% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

## *The Need for Action in Indiana*

For decades, infrastructure in Indiana has suffered from a systemic lack of investment. The need for action is clear:

Indiana's infrastructure received a **C-** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Indiana there are 1,111 bridges and over 5,478 miles of highway in poor condition. Since 2011, commute times have increased by 4.4% in Indiana and on average, each driver pays \$638 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Hoosiers who take public transportation spend an extra 88.7% of their time commuting and non-White households are 4.5 times more likely to commute via public transportation. 38% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Indiana has experienced 34 extreme weather events, costing the state up to \$10 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Indiana's drinking water infrastructure will require \$7.5 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 358,000 renters in Indiana are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 12.4% of Hoosiers live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 48.4% of Hoosiers live in areas where there is only one such provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 16% of Indiana households do not have an internet subscription. The American Jobs Plan would invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Indiana, there is an estimated \$518 million gap in what schools need to do maintenance and make improvements and 55% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Indiana and the country.

- **MANUFACTURING:** Manufacturers account for more than 27.8% of total output in Indiana, employing 541,000 workers, or 17.1% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers.
- **HOME ENERGY:** In Indiana, an average low-income family spends 8-10% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 86,892 Hoosiers working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Indiana is home to over 409,836 veterans, 7.6% of whom are women and 46% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

## *The Need for Action in Kansas*

For decades, infrastructure in Kansas has suffered from a systemic lack of investment. The need for action is clear:

Kansas's infrastructure received a **C** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Kansas there are 1,321 bridges and over 1,995 miles of highway in poor condition. Since 2011, commute times have increased by 6.6% in Kansas and on average, each driver pays \$509 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Kansans who take public transportation spend an extra 65.7% of their time commuting and non-White households are 3.0 times more likely to commute via public transportation. 12% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Kansas has experienced 42 extreme weather events, costing the state up to \$20 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Kansas's drinking water infrastructure will require \$5.3 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 163,000 renters in Kansas are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 14.3% of Kansans live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 51% of Kansans live in areas where there is only one such provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 15% of Kansas households do not have an internet subscription. The American Jobs Plan would invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.

- **CHILD CARE:** In Kansas, there is an estimated \$257 million gap in what schools need to do maintenance and make improvements and 44% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Kansas and the country.
- **MANUFACTURING:** Manufacturers account for more than 16.3% of total output in Kansas, employing 167,000 workers, or 11.7% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers.
- **HOME ENERGY:** In Kansas, an average low-income family spends 6-8% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 24,909 Kansans working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Kansas is home to over 191,186 veterans, 9.2% of whom are women and 45.6% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

## *The Need for Action in Kentucky*

For decades, infrastructure in Kentucky has suffered from a systemic lack of investment. The need for action is clear:

Kentucky's infrastructure received a **C-** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Kentucky there are 1,033 bridges and over 1,322 miles of highway in poor condition. Since 2011, commute times have increased by 6.3% in Kentucky and on average, each driver pays \$444 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Kentuckians who take public transportation spend an extra 60.1% of their time commuting and non-White households are 6.2 times more likely to commute via public transportation. 15% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Kentucky has experienced 26 extreme weather events, costing the state up to \$10 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Kentucky's drinking water infrastructure will require \$8.2 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 128,000 renters in Kentucky are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 12% of Kentuckians live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 50% of Kentuckians live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 17% of Kentucky households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Kentucky, there is an estimated \$453 million gap in what schools need to do maintenance and make improvements and 50% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Kentucky and the country.

- **MANUFACTURING:** Manufacturers account for more than 18% of total output in Kentucky, employing 255,000 workers, or 614% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers, including providing incentives for manufacturers to invest in innovative energy projects in coal communities.
- **HOME ENERGY:** In Kentucky, an average low-income family spends 8-10% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 38,266 Kentuckians working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Kentucky is home to over 295,000 veterans, 8.2% of whom are women and 45.8% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in Louisiana*

For decades, infrastructure in Louisiana has suffered from a systemic lack of investment. The need for action is clear:

Louisiana's infrastructure received a **D+** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Louisiana there are 1,634 bridges and over 3,411 miles of highway in poor condition. Since 2011, commute times have increased by 9.3% in Louisiana and on average, each driver pays \$667 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nation's transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Louisianans who take public transportation spend an extra 62.1% of their time commuting and non-White households are 4.3 times more likely to commute via public transportation. 25% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Louisiana has experienced 30 extreme weather events, costing the state up to \$50 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Louisiana's drinking water infrastructure will require \$7.3 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 307,000 renters in Louisiana are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 14% of Louisianan's live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 60% of Louisianans live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 19% of Louisiana households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Louisiana, there is an estimated \$553 million gap in what schools need to do maintenance and make improvements and 42% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Louisiana and the country.

- **MANUFACTURING:** Manufacturers account for more than 18% of total output in Louisiana, employing 255,000 workers, or 13% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers.
- **HOME ENERGY:** In Louisiana, an average low-income family spends 8-10% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 10,078 Louisianans working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Louisiana is home to over 140,000 veterans, 7.2% of whom are women and 51% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in Massachusetts*

For decades, infrastructure in Massachusetts has suffered from a systemic lack of investment. The need for action is clear:

Massachusetts's infrastructure received a **C-** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Massachusetts there are 472 bridges and over 1,194 miles of highway in poor condition. Since 2011, commute times have increased by 10.9% in Massachusetts and on average, each driver pays \$620 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nation's transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Bay Staters who take public transportation spend an extra 52.9% of their time commuting and non-White households are 2 times more likely to commute via public transportation. 23% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Massachusetts has experienced 14 extreme weather events, costing the state up to \$5 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Massachusetts's drinking water infrastructure will require \$12.2 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 478,000 renters in Massachusetts are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 2.5% of Bay Staters live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 45.6% of Bay Staters live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 11.1% of Massachusetts households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Massachusetts, there is an estimated \$1.39 billion gap in what schools need to do maintenance and make improvements and 53% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in

neighborhoods across Massachusetts and the country.

- **MANUFACTURING:** Manufacturers account for more than 9.4% of total output in Massachusetts, employing 243,000 workers, or 6.6% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers.
- **HOME ENERGY:** In Massachusetts, an average low-income family spends 6-8% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 122,477 Bay Staters working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Massachusetts is home to over 323,200 veterans, 6.9% of whom are women and 57.4% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in Maryland*

For decades, infrastructure in Maryland has suffered from a systemic lack of investment. The need for action is clear:

Maryland's infrastructure received a **C** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Maryland there are 273 bridges and over 2,201 miles of highway in poor condition. Since 2011, commute times have increased by 5.1% in Maryland and on average, each driver pays \$637 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Marylanders who take public transportation spend an extra 66.3% of their time commuting and non-White households are 2.7 times more likely to commute via public transportation. 23% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Maryland has experienced 31 extreme weather events, costing the state up to \$10 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Maryland's drinking water infrastructure will require \$9.3 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 353,000 renters in Maryland are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 3.8% of Marylanders live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 34.5% of Marylanders live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 10.9% of Maryland households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Maryland, there is an estimated \$615 million gap in what schools need to do maintenance and make improvements and 51% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Maryland and the country.

- **MANUFACTURING:** Manufacturers account for more than 5.89% of total output in Maryland, employing 108,000 workers, or 3.92% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers.
- **HOME ENERGY:** In Maryland, an average low-income family spends 6-8% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 84,549 Marylanders working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Maryland is home to over 389,600 veterans, 13.3% of whom are women and 42.2% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in Maine*

For decades, infrastructure in Maine has suffered from a systemic lack of investment. The need for action is clear:

Maine's infrastructure received a **C-** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Maine there are 315 bridges and over 1,438 miles of highway in poor condition. Since 2011, commute times have increased by 1.9% in Maine and on average, each driver pays \$543 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Mainers who take public transportation spend an extra 85.8% of their time commuting and non-White households are 2.2 times more likely to commute via public transportation. 49% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Maine has experienced 3 extreme weather events, costing the state up to \$100 million in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Maine's drinking water infrastructure will require \$1.3 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 68,000 renters in Maine are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 8% of Mainers live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 85.3% of Mainers live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 15% of Maine households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Maine, there is an estimated \$304 million gap in what schools need to do maintenance and make improvements and 22% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Maine and the country.

- **MANUFACTURING:** Manufacturers account for more than 10% of total output in Maine, employing 53,000 workers, or 8.4% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers.
- **HOME ENERGY:** In Maine, an average low-income family spends 8-10% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 12,798 Mainers working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Maine is home to over 114,000 veterans, 8% of whom are women and 50.7% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in Michigan*

For decades, infrastructure in Michigan has suffered from a systemic lack of investment. The need for action is clear:

Michigan's infrastructure received a **D+** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Michigan there are 1,219 bridges and over 7,300 miles of highway in poor condition. Since 2011, commute times have increased by 4.6% in Michigan and on average, each driver pays \$644 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nation's transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Michiganders who take public transportation spend an extra 67.7% of their time commuting and non-White households are 5.6 times more likely to commute via public transportation. 17% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Michigan has experienced 19 extreme weather events, costing the state up to \$5 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Michigan's drinking water infrastructure will require \$13 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 514,000 renters in Michigan are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 8.9% of Michiganders live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 51.4% of Michiganders live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 14.1% of Michigan households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Michigan, there is an estimated \$1.29 billion gap in what schools need to do maintenance and make improvements and 44% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Michigan and the country.

- **MANUFACTURING:** Manufacturers account for more than 19% of total output in Michigan, employing 631,000 workers, or 14.2% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers.
- **HOME ENERGY:** In Michigan, an average low-income family spends 8-10% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 125,365 Michiganders working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Michigan is home to over 589,326 veterans, 7.3% of whom are women and 53.4% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in Minnesota*

For decades, infrastructure in Minnesota has suffered from a systemic lack of investment. The need for action is clear:

Minnesota's infrastructure received a **C** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Minnesota there are 661 bridges and over 4,986 miles of highway in poor condition. Since 2011, commute times have increased by 8.6% in Minnesota and on average, each driver pays \$543 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Minnesotans who take public transportation spend an extra 49.8% of their time commuting and non-White households are 2.8 times more likely to commute via public transportation. 11% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Minnesota has experienced 11 extreme weather events, costing the state up to \$10 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Minnesota's drinking water infrastructure will require \$7.5 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 282,000 renters in Minnesota are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 11.6% of Minnesotans live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 62.7% of Minnesotans live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 12.1% of Minnesota households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Minnesota, there is an estimated \$818 million gap in what schools need to do maintenance and make improvements and 26% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Minnesota and the country.

- **MANUFACTURING:** Manufacturers account for more than 14% of total output in Minnesota, employing 321,000 workers, or 10.8% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers.
- **HOME ENERGY:** In Minnesota, an average low-income family spends 4-6% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 61,805 Minnesotans working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Minnesota is home to over 327,629 veterans, 7.3% of whom are women and 54.5% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in Missouri*

For decades, infrastructure in Missouri has suffered from a systemic lack of investment. The need for action is clear:

Missouri's infrastructure received a **C-** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Missouri there are 2,190 bridges and over 7,576 miles of highway in poor condition. Since 2011, commute times have increased by 5.9% in Missouri and on average, each driver pays \$743 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Missourians who take public transportation spend an extra 79.6% of their time commuting and non-White households are 10 times more likely to commute via public transportation. 32% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Missouri has experienced 44 extreme weather events, costing the state up to \$20 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Missouri's drinking water infrastructure will require \$8.9 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 343,000 renters in Missouri are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 18% of Missourians live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 50% of Missourians live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 15% of Missouri households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Missouri, there is an estimated \$685 million gap in what schools need to do maintenance and make improvements and 54% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Missouri and the country.

- **MANUFACTURING:** Manufacturers account for more than 12.8% of total output in Missouri, employing 277,000 workers, or 9.5% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers.
- **HOME ENERGY:** In Missouri, an average low-income family spends 10-12% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 56,486 Missourians working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Missouri is home to over 442,000 veterans, 8.1% of whom are women and 48.7% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

## *The Need for Action in Mississippi*

For decades, infrastructure in Mississippi has suffered from a systemic lack of investment. The need for action is clear:

Mississippi's infrastructure received a **D+** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Mississippi there are 1,386 bridges and over 5,840 miles of highway in poor condition. Since 2011, commute times have increased by 5.6% in Mississippi and on average, each driver pays \$637 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nation's transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Mississippians who take public transportation spend an extra 87.7% of their time commuting and non-White households are 2.9 times more likely to commute via public transportation. 41% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Mississippi has experienced 33 extreme weather events, costing the state up to \$10 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Mississippi's drinking water infrastructure will require \$4.8 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 159,000 renters in Mississippi are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 26% of Mississippians live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 50.1% of Mississippians live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 23% of Mississippi households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Mississippi, there is an estimated \$289 million gap in what schools need to do maintenance and make improvements and 48% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Mississippi and the country.

- **MANUFACTURING:** Manufacturers account for more than 16% of total output in Mississippi, employing 147,000 workers, or 12.5% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers.
- **HOME ENERGY:** In Mississippi, an average low-income family spends 12-14% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 20,985 Mississippians working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Mississippi is home to over 191,000 veterans, 10.7% of whom are women and 42.27% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

## *The Need for Action in New Hampshire*

For decades, infrastructure in New Hampshire has suffered from a systemic lack of investment. The need for action is clear:

New Hampshire's infrastructure received a **C-** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In New Hampshire there are 215 bridges and over 698 miles of highway in poor condition. Since 2011, commute times have increased by 5.9% in New Hampshire and on average, each driver pays \$476 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nation's transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Granite Staters who take public transportation spend an extra 114.9% of their time commuting and non-White households are 2.1 times more likely to commute via public transportation. 32% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, New Hampshire has experienced 5 extreme weather events, costing the state up to \$500 million in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, New Hampshire's drinking water infrastructure will require \$1 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 73,000 renters in New Hampshire are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 5% of Granite Staters live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 62.7% of Granite Staters live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 10% of New Hampshire households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In New Hampshire, there is an estimated \$324 million gap in what schools need to do maintenance and make improvements and 46% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in

neighborhoods across New Hampshire and the country.

- **MANUFACTURING:** Manufacturers account for more than 11.6% of total output in New Hampshire, employing 70,000 workers, or 10.1% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers, including providing incentives for manufacturers to invest in innovative energy projects.
- **HOME ENERGY:** In New Hampshire, an average low-income family spends 8-10% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 16,571 Granite Staters working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** New Hampshire is home to over 100,000 veterans, 8.1% of whom are women and 51% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

## *The Need for Action in New Jersey*

For decades, infrastructure in New Jersey has suffered from a systemic lack of investment. The need for action is clear:

New Jersey's infrastructure received a **D+** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In New Jersey there are 502 bridges and over 3,995 miles of highway in poor condition. Since 2011, commute times have increased by 8.8% in New Jersey and on average, each driver pays \$713 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** New Jersey residents who take public transportation spend an extra 82.7% of their time commuting and non-White households are twice as likely to commute via public transportation. 22% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, New Jersey has experienced 23 extreme weather events, costing the state up to \$50 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, New Jersey's drinking water infrastructure will require \$8.6 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 580,000 renters in New Jersey are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 31.2% of New Jersey residents live in areas where there is only one broadband internet provider offering minimally acceptable speeds. Even where infrastructure is available, broadband may be too expensive to be within reach. 10% of New Jersey households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In New Jersey, there is an estimated \$1.6 billion gap in what schools need to do maintenance and make improvements and 46% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across New Jersey and the country.

- **MANUFACTURING:** Manufacturers account for more than 8% of total output in New Jersey, employing 251,000 workers, or 5.9% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers, including providing incentives for manufacturers to invest in innovative energy projects.
- **HOME ENERGY:** In New Jersey, an average low-income family spends 6-8% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 57,139 New Jersey residents working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** New Jersey is home to over 300,000 veterans, 7.2% of whom are women and 58% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

## *The Need for Action in New Mexico*

For decades, infrastructure in New Mexico has suffered from a systemic lack of investment. The need for action is clear:

The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In New Mexico there are 207 bridges and over 3,822 miles of highway in poor condition. Since 2011, commute times have increased by 7.7% in New Mexico and on average, each driver pays \$767 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nation's transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** New Mexico residents who take public transportation spend an extra 94.3% of their time commuting. 20% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, New Mexico has experienced 14 extreme weather events, costing the state up to \$5 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, New Mexico's drinking water infrastructure will require \$1.4 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 126,000 renters in New Mexico are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 22% of New Mexico residents live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 68.9% of New Mexicans live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 21% of New Mexico households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In New Mexico, there is an estimated \$407 million gap in what schools need to do maintenance and make improvements and 53% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across New Mexico and the country.

- **MANUFACTURING:** Manufacturers account for more than 4% of total output in New Mexico, employing 27,000 workers, or 3.2% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers, including providing incentives for manufacturers to invest in innovative energy projects.
- **HOME ENERGY:** In New Mexico, an average low-income family spends 6-8% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 12,365 New Mexico residents working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** New Mexico is home to over 150,000 veterans, 10.2% of whom are women and 48% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

## *The Need for Action in Nevada*

For decades, infrastructure in Nevada has suffered from a systemic lack of investment. The need for action is clear:

Nevada's infrastructure received a **C** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Nevada there are 28 bridges and over 1,090 miles of highway in poor condition. Since 2011, commute times have increased by 7.7% in Nevada and on average, each driver pays \$558 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Nevadans who take public transportation spend an extra 133.9% of their time commuting and non-White households are 2.0 times more likely to commute via public transportation. 5% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Nevada has experienced 12 extreme weather events, costing the state up to \$1 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Nevada's drinking water infrastructure will require \$5.3 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 243,000 renters in Nevada are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 8.6% of Nevadans live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 72% of Nevadans live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 14% of Nevada households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Nevada, there is an estimated \$52 million gap in what schools need to do maintenance and make improvements and 72% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Nevada and the country.

- **MANUFACTURING:** Manufacturers account for more than 4% of total output in Nevada, employing 60,000 workers, or 4.2% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers, including providing incentives for manufacturers to invest in innovative energy projects.
- **HOME ENERGY:** In Nevada, an average low-income family spends 6-8% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 33,788 Nevadans working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Nevada is home to over 215,000 veterans, 9.9% of whom are women and 47% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

## *The Need for Action in New York*

For decades, infrastructure in New York has suffered from a systemic lack of investment. The need for action is clear:

New York's infrastructure received a **C-** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In New York there are 1,702 bridges and over 7,292 miles of highway in poor condition. Since 2011, commute times have increased by 7.4% in New York and on average, each driver pays \$625 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** New Yorkers who take public transportation spend an extra 58.9% of their time commuting and non-White households are 2.5 times more likely to commute via public transportation. 11% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, New York has experienced 31 extreme weather events, costing the state up to \$100 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, New York's drinking water infrastructure will require \$22.8 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 1.7 million renters in New York are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 31.4% of New Yorkers live in areas where there is only one broadband internet provider providing minimally acceptable speeds. Even where infrastructure is available, broadband may be too expensive to be within reach. 13% of New York households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In New York, there is an estimated \$2.91 billion gap in what schools need to do maintenance and make improvements and 64% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across New York and the country.

- **MANUFACTURING:** Manufacturers account for more than 4% of total output in New York, employing 441,000 workers, or 4.5% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers, including providing incentives for manufacturers to invest in innovative energy projects.
- **HOME ENERGY:** In New York, an average low-income family spends 6-8% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 159,337 New Yorkers working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** New York is home to over 700,000 veterans, 7.5% of whom are women and 54% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in Ohio*

For decades, infrastructure in Ohio has suffered from a systemic lack of investment. The need for action is clear:

Ohio's infrastructure received a **C-** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Ohio there are 1,377 bridges and over 4,925 miles of highway in poor condition. Since 2011, commute times have increased by 5.7% in Ohio and on average, each driver pays \$506 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Ohioans who take public transportation spend an extra 75.9% of their time commuting and non-White households are 6.2 times more likely to commute via public transportation. 16% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Ohio has experienced 29 extreme weather events, costing the state up to \$10 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Ohio's drinking water infrastructure will require \$13.4 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 681,000 renters in Ohio are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 6.2% of Ohioans live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 58.2% of Ohioans live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 14% of Ohio households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Ohio, there is an estimated \$683 million gap in what schools need to do maintenance and make improvements and 39% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Ohio and the country.

- **MANUFACTURING:** Manufacturers account for more than 16% of total output in Ohio, employing 703,000 workers, or 12.6% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers, including providing incentives for manufacturers to invest in innovative energy projects in coal communities.
- **HOME ENERGY:** In Ohio, an average low-income family spends 8-10% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 114,388 Ohioans working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Ohio is home to over 700,000 veterans, 7.9% of whom are women and 49% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

## *The Need for Action in Oregon*

For decades, infrastructure in Oregon has suffered from a systemic lack of investment. The need for action is clear:

Oregon's infrastructure received a **C-** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Oregon there are 395 bridges and over 1,287 miles of highway in poor condition. Since 2011, commute times have increased by 7.0% in Oregon and on average, each driver pays \$256 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Oregonians who take public transportation spend an extra 82% of their time commuting and non-White households are 1.8 times more likely to commute via public transportation. 19% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Oregon has experienced 12 extreme weather events, costing the state up to \$5 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Oregon's drinking water infrastructure will require \$6.3 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 296,000 renters in Oregon are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 9.8% of Oregonians live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 44.5% of Oregonians live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 11% of Oregon households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Oregon, there is an estimated \$857 million gap in what schools need to do maintenance and make improvements and 60% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Oregon and the country.

- **MANUFACTURING:** Manufacturers account for more than 14% of total output in Oregon, employing 201,000 workers, or 10.4% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers, including providing incentives for manufacturers to invest in innovative energy projects.
- **HOME ENERGY:** In Oregon, an average low-income family spends 6-8% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 56,617 Oregonians working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Oregon is home to over 300,000 veterans, 8.4% of whom are women and 53% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in Pennsylvania*

For decades, infrastructure in Pennsylvania has suffered from a systemic lack of investment. The need for action is clear:

Pennsylvania's infrastructure received a **C-** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Pennsylvania there are 3,353 bridges and over 7,540 miles of highway in poor condition. Since 2011, commute times have increased by 7.6% in Pennsylvania and on average, each driver pays \$620 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nation's transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Pennsylvanians who take public transportation spend an extra 68.8% of their time commuting and non-White households are five times more likely to commute via public transportation. 22% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Pennsylvania has experienced 37 extreme weather events, costing the state up to \$10 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Pennsylvania's drinking water infrastructure will require \$16.8 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 720,000 renters in Pennsylvania are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 5% of Pennsylvanians live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 44% of Pennsylvanians live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 14% of Pennsylvania households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Pennsylvania, there is an estimated \$1.41 billion gap in what schools need to do maintenance and make improvements and 57% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in

neighborhoods across Pennsylvania and the country.

- **MANUFACTURING:** Manufacturers account for more than 11% of total output in Pennsylvania, employing 565,000 workers, or 9.3% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers, including providing incentives for manufacturers to invest in innovative energy projects in coal communities.
- **HOME ENERGY:** In Pennsylvania, an average low-income family spends 8-10% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** As of 2019, there were 93,861 Pennsylvanians working in clean energy, and the American Jobs Plan invests in creating more good paying union jobs advancing clean energy production by extending and expanding tax credits for clean energy generation, carbon capture and sequestration and clean energy manufacturing.
- **VETERANS HEALTH:** Pennsylvania is home to over 800,000 veterans, 7.3% of whom are women and 55% of whom are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in Puerto Rico*

For decades, infrastructure in Puerto Rico has suffered from a systemic lack of investment. The need for action is clear:

Puerto Rico's infrastructure received a **D-** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Puerto Rico there are 282 bridges and over 1,492 miles of highway in poor condition. The American Jobs Plan will devote more than \$600 billion to transform our nation's transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Nearly 5% of trains and other transit vehicles in Puerto Rico are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Puerto Rico has experienced several extreme weather events, costing Puerto Rico tens of billions of dollars in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Puerto Rico's drinking water infrastructure will require \$3.7 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** To help with the rent burden Puerto Ricans are facing, the President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** Over 13% of Puerto Ricans live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 68.8% of Puerto Ricans live in areas where there is only one such provider. Moreover, even where infrastructure is available, broadband may be too expensive to be within reach. Nearly 40% of Puerto Rico households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Puerto Rico, there is an enormous gap in what schools need to do maintenance and make improvements and far too many residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Puerto Rico and the country.
- **MANUFACTURING:** The American Jobs Plan will invest \$300 billion to retool and revitalize American manufacturers, including providing incentives for manufacturers to invest in innovative energy projects

in coal communities.

- **HOME ENERGY:** In Puerto Rico, an average low-income family spends far too much of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** Puerto Rico has outsized potential for innovative energy technologies including carbon capture and sequestration and geothermal energy generation, that create good paying union jobs. The American Jobs Plan invests in building that industry through a reformed and expanded Section 45Q tax credit and extending renewable energy tax credits.
- **VETERANS HEALTH:** Puerto Rico is home to over 79,000 veterans, 5.5% of who are women and 63.9% who are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in Rhode Island*

For decades, infrastructure in Rhode Island has suffered from a systemic lack of investment. The need for action is clear:

Rhode Island's infrastructure received a **C-** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Rhode Island there are 148 bridges and over 860 miles of highway in poor condition. Since 2011, commute times have increased by 10.2% in Rhode Island and on average, each driver pays \$845 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Rhode Islanders who take public transportation spend an extra 120.1% of their time commuting and non-White households are 2.4 times more likely to commute via public transportation. 27% of trains and other transit vehicles are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Rhode Island has experienced 11 extreme weather events, costing the state up to \$2 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Rhode Island's drinking water infrastructure will require \$833 million in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 73,000 renters in Rhode Island are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** More than 1.4% of Rhode Islanders live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 10.5% of Rhode Islanders live in areas where there is only one such provider. Moreover, even where infrastructure is available, broadband may be too expensive to be within reach. Over 12% of Rhode Island households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Rhode Island, there is an estimated \$241 million in what schools need to do maintenance and make improvements and 47% of residents live in a child care desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Rhode Island and the country.

- **MANUFACTURING:** Manufacturers account for more than 8.7% of total output in Rhode Island, employing 39,000 workers, or 7.8% of the state's workforce. The American Jobs Plan will invest \$300 billion to retool and revitalize American manufacturers, including providing incentives for manufacturers to invest in innovative energy projects in coal communities.
- **HOME ENERGY:** In Rhode Island, an average low-income family spends 8-10% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** Rhode Island has outsized potential for innovative energy technologies including carbon capture and sequestration and geothermal energy generation, that create good paying union jobs. As of 2019, there were 16,429 Rhode Islanders working in clean energy, and the American Jobs Plan invests in building that industry through a reformed and expanded Section 45Q tax credit and extending renewable energy tax credits.
- **VETERANS HEALTH:** Rhode Island is home to over 63,250 veterans, 7.97% of who are women and 55% who are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in South Carolina*

For decades, infrastructure in South Carolina has suffered from a systemic lack of investment. The need for action is clear:

- **ROADS AND BRIDGES:** In South Carolina there are 745 bridges and over 3,780 miles of highway in poor condition. Since 2011, commute times have increased by 9.4% in South Carolina and on average, each driver pays \$564 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nation's transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** South Carolinians who take public transportation spend an extra 53.8% of their time commuting and non-White households are 4.4 times more likely to commute via public transportation. 19% of trains and other transit vehicles are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, South Carolina has experienced 37 extreme weather events, costing the state up to \$20 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, South Carolina's drinking water infrastructure will require \$6.1 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 267,000 renters in South Carolina are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** More than 12% of South Carolinians live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 55.5% of South Carolinians live in areas where there is only one such provider. Moreover, even where infrastructure is available, broadband may be too expensive to be within reach. Over 17% of South Carolina households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In South Carolina, there is an estimated \$90 million in what schools need to do maintenance and make improvements and 42% of residents live in a child care desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across South Carolina and the country.

- **MANUFACTURING:** Manufacturers account for more than 16.8% of total output in South Carolina, employing 256,000 workers, or 11.7% of the state's workforce. The American Jobs Plan will invest \$300 billion to retool and revitalize American manufacturers, including providing incentives for manufacturers to invest in innovative energy projects in coal communities.
- **HOME ENERGY:** In South Carolina, an average low-income family spends 10-12% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** South Carolina has outsized potential for innovative energy technologies including carbon capture and sequestration and geothermal energy generation, that create good paying union jobs. As of 2019, there were 46,527 South Carolinians working in clean energy, and the American Jobs Plan invests in building that industry through a reformed and expanded Section 45Q tax credit and extending renewable energy tax credits.
- **VETERANS HEALTH:** South Carolina is home to over 402,000 veterans, 10.7% of who are women and 45% who are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in South Dakota*

For decades, infrastructure in South Dakota has suffered from a systemic lack of investment. The need for action is clear:

South Dakota's infrastructure received a **C-** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In South Dakota there are 1,038 bridges and over 2,031 miles of highway in poor condition. Since 2011, commute times have increased by 1.2% in South Dakota and on average, each driver pays \$562 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** South Dakotans who take public transportation spend an extra 97.7% of their time commuting and non-White households are 2.7 times more likely to commute via public transportation. 47% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, South Dakota has experienced 12 extreme weather events, costing the state up to \$10 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, South Dakota's drinking water infrastructure will require \$730 million in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 42,000 renters in South Dakota are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 13% of South Dakotans live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 48% of South Dakotans live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 15% of South Dakota households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In South Dakota, there is an estimated \$125 million gap in what schools need to do maintenance and make improvements and 43% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in

neighborhoods across South Dakota and the country.

- **MANUFACTURING:** Manufacturers account for more than 10.3% of total output in South Dakota, employing 46,000 workers, or 10.27% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers, including providing incentives for manufacturers to invest in innovative energy projects in coal communities.
- **HOME ENERGY:** In South Dakota, an average low-income family spends 8-10% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** South Dakota has outsized potential for innovative energy technologies including carbon capture and sequestration and geothermal energy generation, that create good paying union jobs. As of 2019, there were 11,458 South Dakotans working in clean energy, and the American Jobs Plan invests in building that industry through a reformed and expanded Section 45Q tax credit and extending renewable energy tax credits.
- **VETERANS HEALTH:** South Dakota is home to over 65,000 veterans, 9.97% of who are women and 44.95% who are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in Tennessee*

For decades, infrastructure in Tennessee has suffered from a systemic lack of investment. The need for action is clear:

- **ROADS AND BRIDGES:** In Tennessee there are 881 bridges and over 270 miles of highway in poor condition. Since 2011, commute times have increased by 7.7% in Tennessee and on average, each driver pays \$209 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nation's transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Tennesseans who take public transportation spend an extra 67.9% of their time commuting and non-White households are 5.6 times more likely to commute via public transportation. 21% of trains and other transit vehicles are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Tennessee has experienced 40 extreme weather events, costing the state up to \$20 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Tennessee's drinking water infrastructure will require \$8.7 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 396,000 renters in Tennessee are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** Nearly 10% of Tennesseans live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 46.8% of Tennesseans live in areas where there is only one such provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 17% of Tennessee households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Tennessee, there is an estimated \$768 million gap in what schools need to do maintenance and make improvements and 48% of residents live in a child care desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Tennessee and the country.
- **MANUFACTURING:** Manufacturers account for more than 15% of total output in Tennessee, employing 357,000 workers, or 11.5% of the state's workforce. The American Jobs Plan will invest \$300 billion to

retool and revitalize American manufacturers, including providing incentives for manufacturers to invest in innovative energy projects in coal communities.

- **HOME ENERGY:** In Tennessee, an average low-income family spends 8-10% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** Tennessee has outsized potential for innovative energy technologies including carbon capture and sequestration and geothermal energy generation, that create good paying union jobs. As of 2019, there were 79,626 Tennesseans working in clean energy, and the American Jobs Plan invests in building that industry through a reformed and expanded Section 45Q tax credit and extending renewable energy tax credits.
- **VETERANS HEALTH:** Tennessee is home to over 470,000 veterans, 9.4% of who are women and 45% who are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

## *The Need for Action in Texas*

For decades, infrastructure in Texas has suffered from a systemic lack of investment. The need for action is clear:

Texas' infrastructure received a **C** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Texas there are 818 bridges and over 19,400 miles of highway in poor condition. Since 2011, commute times have increased by 11.4% in Texas and on average, each driver pays \$709 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Texas who take public transportation spend an extra 80.8% of their time commuting and non-White households are 2.7 times more likely to commute via public transportation. 12% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Texas has experienced 67 extreme weather events, costing the state up to \$200 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Texas' drinking water infrastructure will require more than \$45 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, more than 1.7 million renters in Texas are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** More than 12% of Texans live in areas where, by one definition, [there is no broadband infrastructure](#) that provides minimally acceptable speeds. And 43.3% of Texans live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 13.7% of Texas households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Texas, 48% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Texas and the country.

- **MANUFACTURING:** Manufacturers account for 13% of total output in Texas, employing 908,000 workers, or 7% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers, including providing incentives for manufacturers to invest in innovative energy projects in coal communities.
- **HOME ENERGY:** In Texas, an average low-income family spends 8-10% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** Texas has outsized potential for innovative energy technologies including carbon capture and sequestration and geothermal energy generation, that create good paying union jobs. As of 2019, there were 241,289 Texans working in clean energy, and the American Jobs Plan invests in building that industry through a reformed and expanded Section 45Q tax credit and extending renewable energy tax credits.
- **VETERANS HEALTH:** Texas is home to over 1.5 million veterans, 11.2% of who are women and 39.6% who are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in Utah*

For decades, infrastructure in Utah has suffered from a systemic lack of investment. The need for action is clear:

Utah's infrastructure received a **C+** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Utah there are 62 bridges and over 2,064 miles of highway in poor condition. Since 2011, commute times have increased by 7.2% in Utah and on average, each driver pays \$709 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nation's transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Utahns who take public transportation spend an extra 103.5% of their time commuting and non-White households are 1.8 times more likely to commute via public transportation. 17% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Utah has experienced 10 extreme weather events, costing the state up to \$1 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Utah's drinking water infrastructure will require \$4.4 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 129,000 renters in Utah are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 9.25% of Utahns live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 54.35% of Utahns live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 9.2% of Utah households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Utah, there is an estimated \$496 million gap in what schools need to do maintenance and make improvements and 77% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Utah and the country.

- **MANUFACTURING:** Manufacturers account for more than 10% of total output in Utah, employing 138,000 workers, or 8.83% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers, including providing incentives for manufacturers to invest in innovative energy projects in coal communities.
- **HOME ENERGY:** In Utah, an average low-income family spends 4-6% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** Utah has outsized potential for innovative energy technologies including carbon capture and sequestration and geothermal energy generation, that create good paying union jobs. As of 2019, there were 44,005 Utahns working in clean energy, and the American Jobs Plan invests in building that industry through a reformed and expanded Section 45Q tax credit and extending renewable energy tax credits.
- **VETERANS HEALTH:** Utah is home to over 134,000 veterans, 7.77% of who are women and 46.58% who are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

## *The Need for Action in Virginia*

For decades, infrastructure in Virginia has suffered from a systemic lack of investment. The need for action is clear:

- **ROADS AND BRIDGES:** In Virginia there are 577 bridges and over 2,124 miles of highway in poor condition. Since 2011, commute times have increased by 7.7% in Virginia and on average, each driver pays \$517 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Virginians who take public transportation spend an extra 72.2% of their time commuting and non-White households are 1.6 times more likely to commute via public transportation. 10% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Virginia has experienced 40 extreme weather events, costing the state up to \$10 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Virginia's drinking water infrastructure will require \$18.1 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, nearly 500,000 renters in Virginia are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 9.7% of Virginians live in areas where, by one definition, [there is no broadband infrastructure](#) that provides minimally acceptable speeds. And 39.4% of Virginians live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 13.3% of Virginia households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Virginia, there is an estimated \$973 million gap in what schools need to do maintenance and make improvements and 47% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Virginia and the country.
- **MANUFACTURING:** Manufacturers account for nearly 9% of total output in Virginia, employing 246,000 workers, or 6.1% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers, including providing incentives for manufacturers to invest in

innovative energy projects in coal communities.

- **HOME ENERGY:** In Virginia, an average low-income family spends 6-8% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** Virginia has outsized potential for innovative energy technologies including carbon capture and sequestration and geothermal energy generation, that create good paying union jobs. As of 2019, there were 97,305 Virginians working in clean energy, and the American Jobs Plan invests in building that industry through a reformed and expanded Section 45Q tax credit and extending renewable energy tax credits.
- **VETERANS HEALTH:** Virginia is home to over 725,028 veterans, 14.3% of who are women and 36.3% who are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

## *The Need for Action in Vermont*

For decades, infrastructure in Vermont has suffered from a systemic lack of investment. The need for action is clear:

Vermont's infrastructure received a **C** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Vermont there are 66 bridges and over 666 miles of highway in poor condition. Since 2011, commute times have increased by 9.2% in Vermont and on average, each driver pays \$517 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Vermonters who take public transportation spend an extra 40.2% of their time commuting and non-White households are 2.6 times more likely to commute via public transportation. 25% of trains and other transit vehicles are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Vermont has experienced 3 extreme weather events, costing the state up to \$1 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Vermont's drinking water infrastructure will require \$643 million in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 31,000 renters in Vermont are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** More than 14.5% of Vermont live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 66.5% of Vermonters live in areas where there is only one such provider. Moreover, even where infrastructure is available, broadband may be too expensive to be within reach. Over 12% of Vermont households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Vermont, there is an estimated \$973 million in what schools need to do maintenance and make improvements and 35% of residents live in a child care desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Vermont and the country.

- **MANUFACTURING:** Manufacturers account for more than 9.7% of total output in Vermont, employing 30,000 workers, or 9.78% of the state's workforce. The American Jobs Plan will invest \$300 billion to retool and revitalize American manufacturers, including providing incentives for manufacturers to invest in innovative energy projects in coal communities.
- **HOME ENERGY:** In Vermont, an average low-income family spends 8-10% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** Vermont has outsized potential for innovative energy technologies including carbon capture and sequestration and geothermal energy generation, that create good paying union jobs. As of 2019, there were 16,635 Vermonters working in clean energy, and the American Jobs Plan invests in building that industry through a reformed and expanded Section 45Q tax credit and extending renewable energy tax credits.
- **VETERANS HEALTH:** Vermont is home to over 43,191 veterans, 8.76% of who are women and 50.8% who are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in Washington*

For decades, infrastructure in Washington has suffered from a systemic lack of investment. The need for action is clear:

Washington's infrastructure received a **C** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Washington there are 416 bridges and over 5,469 miles of highway in poor condition. Since 2011, commute times have increased by 12.7% in Washington and on average, each driver pays \$659 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Washingtonians who take public transportation spend an extra 72.9% of their time commuting and non-White households are 1.7 times more likely to commute via public transportation. 17% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Washington has experienced 10 extreme weather events, costing the state up to \$5 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Washington's drinking water infrastructure will require \$11.7 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 487,000 renters in Washington are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 8.49% of Washingtonians live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 53.82% of Washington live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 8.8% of Washington households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Washington, there is an estimated \$556 million gap in what schools need to do maintenance and make improvements and 63% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Washington and the country.

- **MANUFACTURING:** Manufacturers account for more than 11% of total output in Washington, employing 298,000 workers, or 8.5% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers, including providing incentives for manufacturers to invest in innovative energy projects in coal communities.
- **HOME ENERGY:** In Washington, an average low-income family spends 4-6% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** Washington has outsized potential for innovative energy technologies including carbon capture and sequestration and geothermal energy generation, that create good paying union jobs. As of 2019, there were 85,035 Washingtonians working in clean energy, and the American Jobs Plan invests in building that industry through a reformed and expanded Section 45Q tax credit and extending renewable energy tax credits.
- **VETERANS HEALTH:** Washington is home to over 560,000 veterans, 10% of who are women and 44% who are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in Wisconsin*

For decades, infrastructure in Wisconsin has suffered from a systemic lack of investment. The need for action is clear:

Wisconsin's infrastructure received a **C** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In Wisconsin there are 198 bridges and over 1,949 miles of highway in poor condition. Since 2011, commute times have increased by 2.8% in Wisconsin and on average, each driver pays \$547 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nation's transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Wisconsin residents who take public transportation spend an extra 62.7% of their time commuting and non-White households are 5.9 times more likely to commute via public transportation. 29% of trains and other transit vehicles are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Wisconsin has experienced 16 extreme weather events, costing the state up to \$10 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Wisconsin's drinking water infrastructure will require \$8.6 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 327,000 renters in Wisconsin are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** More than 13.9% of Wisconsin residents live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 69% of Wisconsin residents live in areas where there is only one such provider. Moreover, even where infrastructure is available, broadband may be too expensive to be within reach. Approximately 14% of Wisconsin households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Wisconsin, there is an estimated \$836 million in what schools need to do maintenance and make improvements and 54% of residents live in a child care desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Wisconsin and the country.

- **MANUFACTURING:** Manufacturers account for more than 18.79% of total output in Wisconsin, employing 474,000 workers, or 15.89% of the state's workforce. The American Jobs Plan will invest \$300 billion to retool and revitalize American manufacturers, including providing incentives for manufacturers to invest in innovative energy projects in coal communities.
- **HOME ENERGY:** In Wisconsin, an average low-income family spends 6-8% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** Wisconsin has outsized potential for innovative energy technologies including carbon capture and sequestration and geothermal energy generation, that create good paying union jobs. As of 2019, there were 76,685 Wisconsin residents working in clean energy, and the American Jobs Plan invests in building that industry through a reformed and expanded Section 45Q tax credit and extending renewable energy tax credits.
- **VETERANS HEALTH:** Wisconsin is home to over 363,898 veterans, 7.94% of who are women and 52.94% who are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in West Virginia*

For decades, infrastructure in West Virginia has suffered from a systemic lack of investment. The need for action is clear:

West Virginia's infrastructure received a **D** grade on its Infrastructure Report Card. The American Jobs Plan will make a historic investment in our nation's infrastructure.

- **ROADS AND BRIDGES:** In West Virginia there are 1,545 bridges and over 3,200 miles of highway in poor condition. Since 2011, commute times have increased by 6.4% in West Virginia and on average, each driver pays \$726 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nations' transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** West Virginians who take public transportation spend an extra 76.7% of their time commuting and non-White households are 4.9 times more likely to commute via public transportation. 32% of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, West Virginia has experienced 11 extreme weather events, costing the state up to \$2 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, West Virginia's drinking water infrastructure will require \$1.4 billion in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 83,000 renters in West Virginia are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 24% of West Virginians live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 66.8% of West Virginians live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. 19% of West Virginia households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In West Virginia, there is an estimated \$836 million gap in what schools need to do maintenance and make improvements and 64% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across West Virginia and the country.

- **MANUFACTURING:** Manufacturers account for more than 10% of total output in West Virginia, employing 48,000 workers, or 6.5% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers, including providing incentives for manufacturers to invest in innovative energy projects in coal communities.
- **HOME ENERGY:** In West Virginia, an average low-income family spends 10-12% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** West Virginia has outsized potential for innovative energy technologies including carbon capture and sequestration and geothermal energy generation, that create good paying union jobs. As of 2019, there were 10,078 West Virginians working in clean energy, and the American Jobs Plan invests in building that industry through a reformed and expanded Section 45Q tax credit and extending renewable energy tax credits.
- **VETERANS HEALTH:** West Virginia is home to over 140,000 veterans, 7.2% of who are women and 51% who are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.

# AMERICAN JOBS PLAN

## *The Need for Action in Wyoming*

For decades, infrastructure in Wyoming has suffered from a systemic lack of investment. The need for action is clear:

- **ROADS AND BRIDGES:** In Wyoming there are 218 bridges and over 380 miles of highway in poor condition. Since 2011, commute times have increased by 3.5% in Wyoming and on average, each driver pays \$295 per year in costs due to driving on roads in need of repair. The American Jobs Plan will devote more than \$600 billion to transform our nation's transportation infrastructure and make it more resilient, including \$115 billion repairing roads and bridges.
- **PUBLIC TRANSPORTATION:** Wyomingites who take public transportation spend an extra 150% of their time commuting and non-White households are 1.2 times more likely to commute via public transportation. 32 percent of trains and other transit vehicles in the state are past useful life. The American Jobs Plan will modernize public transit with an \$85 billion investment.
- **RESILIENT INFRASTRUCTURE:** From 2010 to 2020, Wyoming has experienced 15 extreme weather events, costing the state up to \$5 billion in damages. The President is calling for \$50 billion to improve the resiliency of our infrastructure and support communities' recovery from disaster.
- **DRINKING WATER:** Over the next 20 years, Wyoming's drinking water infrastructure will require \$458 million in additional funding. The American Jobs Plan includes a \$111 billion investment to ensure clean, safe drinking water is a right in all communities.
- **HOUSING:** In part due to a lack of available and affordable housing, 27,000 renters in Wyoming are rent burdened, meaning they spend more than 30% of their income on rent. The President proposes investing over \$200 billion to increase housing supply and address the affordable housing crisis.
- **BROADBAND:** 27% of Wyomingites live in areas where, by one definition, there is no broadband infrastructure that provides minimally acceptable speeds. And 63.6% of Wyomingites live in areas where there is only one such internet provider. Even where infrastructure is available, broadband may be too expensive to be within reach. Nearly 12% of Wyoming households do not have an internet subscription. The American Jobs Plan will invest \$100 billion to bring universal, reliable, high-speed, and affordable coverage to every family in America.
- **CAREGIVING:** Across the country, hundreds of thousands of older adults and people with disabilities are in need of home and community-based services. The President's plan will invest \$400 billion to help more people access care and improve the quality of caregiving jobs.
- **CHILD CARE:** In Wyoming, there is an estimated \$149 million gap in what schools need to do maintenance and make improvements and 34% of residents live in a childcare desert. The American Jobs Plan will modernize our nation's schools and early learning facilities and build new ones in neighborhoods across Wyoming and the country.
- **MANUFACTURING:** Manufacturers account for more than 5% of total output in Wyoming, employing 10,000 workers, or 3.5% of the state's workforce. The American Job's Plan will invest \$300 billion to retool and revitalize American manufacturers, including providing incentives for manufacturers to invest

in innovative energy projects in coal communities.

- **HOME ENERGY:** In Wyoming, an average low-income family spends 6-8% of their income on home energy costs forcing tough choices between paying energy bills and buying food, medicine or other essentials. The American Jobs Plan will upgrade low-income homes to make them more energy efficient through a historic investment in the Weatherization Assistance Program, a new Clean Energy and Sustainability Accelerator to finance building improvements, and expanded tax credits to support home energy upgrades.
- **CLEAN ENERGY JOBS:** Wyoming has outsized potential for innovative energy technologies including carbon capture and sequestration and geothermal energy generation, that create good paying union jobs. As of 2019, there were 8,721 Wyomingites working in clean energy, and the American Jobs Plan invests in building that industry through a reformed and expanded Section 45Q tax credit and extending renewable energy tax credits.
- **VETERANS HEALTH:** Wyomingites home to over 47,000 veterans, 9.8% of who are women and 43% who are over the age of 65. The President is calling for \$18 billion to improve the infrastructure of VA health care facilities to ensure the delivery of world-class, state of the art care to veterans enrolled in the VA health care system. This includes improvements to ensure appropriate care for women and older veterans.
