

What does the Arizonans for Fair Elections ballot measure do?

Protects the freedom to vote

- Protects the rights of voters to remain on the popular, bipartisan permanent early voting list (PEVL) and prohibits politicians and bureaucrats from removing voters from the PEVL for missing a few elections.
- Ensures Arizona voters' registration is updated when they sign up for drivers licenses, state identification cards, or change address at the MVD. This safe, hassle-free process ensures that Arizona voter information is accurate and up to date.
- Extends in-person early voting through the day before election day and allows voters to vote at any polling location in their county.
- Protects the rights of Tribal voters by requiring Tribal input on the location and hours of polling places, and protects voters with disabilities by ensuring the availability of a variety of voting methods, including curbside voting.
- Eliminates outdated deadlines by making voter registration available through election day.
- Protects the right to offer food and hydration to people waiting in line at polling places.

Protects our elections from partisan meddling

- Prevents the state legislature from overturning presidential election results. The people, not the politicians, should decide who wins elections.
- Protects the privacy of ballots and guards against ballots and other election materials being turned over for improper uses.
- Provides additional funding sources for basic elections infrastructure.

Safeguards voters' right to pass our own laws

- Protects ballot measure petition signatures from being disqualified for frequently-abused technicalities, so that voters maintain the right to decide for ourselves.

Fights corruption and limits the power of lobbyists

- Combats corruption by prohibiting lobbyists from giving certain gifts to politicians, including banning lobbyists from paying for lawmakers' travel and expensive meals.
- Reduces the amounts that any one individual or PAC may contribute to candidates.
- Reduces the power of special interests by increasing Clean Elections funding for candidates who agree not to take corporate funding or large private contributions.

How we pay for it

- The measure is fully paid for by increasing the lobbyist registration fee from \$25 to \$50, increasing the minimum income tax for large businesses from \$50 to \$150, and restoring the \$5 tax donations to Clean Elections.
